

## Salamander

The Eurodib salamander is the perfect product for cafes, small restaurants and eateries. The unit comes with independent upper and lower elements that provide a variety of grilling options. The elements are available in quartz (glass) and provide a consistent and even grilling surface.

The Eurodib salamander is heavy duty in construction, fully insulated and comes with a manual timer. The unit is ideal for toasting, grilling, melting cheese and any other products that need variable grilling control.

## Product Features

- Stainless steel construction
- Dual control
- Timer
- Element control switch - selects twin element heat or single upper element heat
- Easy remove/clean stainless steel crumb trays
- Easy remove/clean chrome plated grilling rack
- ABS control dial
- Non slip rubber feet
